FOREWORD

India Today stands at the cusp of the transformation. Emerging global realities have brought new challenges coupled with unprecedented opportunities for India. As global supply chains stands disrupted, India has a unique global role in building resilient global supply chains for the future. In this context India Health Dialogue offers a profound platform to the Indian and global community to build resilient, agile and advance supply chains in health and healthcare.

On the behalf of Ministry of MSME, Government of India, I congratulate India Health Dialogue - A global integrated and collaborative platform for building Future of Health and healthcare, which is in forefront for driving change and building a profound ecosystem to promote AtamNirbhar Bharat in Health sector. This platform also serves a great opportunity for state governments to showcase business and investment opportunities in their respective states both in health services and medical devices manufacturing sector.

Ministry of MSME, Government of India, has identified health as a target sector for import substitution and is partnering with IHD for structured interventions to promote advance manufacturing capabilities among MSME's for achieving AtamNirbhar Bharat and export promotion in Health domain. IHD's role in building vibrant MSME ecosystem to make India future ready is both critical and unprecedented.
